MAXDOCK™

HIGH PERFORMANCE RUBBER DOOR
Ideally suited for high use or damage-prone docks!

DOOR FEATURES

- Galvanized steel guides and powder coated breakaway bottom bar in safety yellow
- Simple, efficient engineering: no hinges, cables or pulleys
- Flexible curtain releases from guides upon accidental impact with breakaway system
- High tension curtain withstands high wind loads
- Low head room clearance - racking can be installed above door

our rubber is of the highest quality and durability, which is why we stand behind it with a lifetime guarantee.

- **Light-tight design eliminates air infiltration** which could lead to reduced energy costs and improved facility containment and audit results
- **Impactable design** provides for reduced maintenance and eliminates downtime
- **Springless operation when motorized** reduces maintenance/repair costs and eliminates safety concerns associated with springs
- **1 million cycle rating** compared to a traditional sectional door providing only 10k cycles leads to a significantly higher product life
